

Help Protect Florida's Environment:
Don't release unwanted pets into the wild

It is illegal to release non-native plants and animals into Florida's natural areas. Many people find that they are no longer able to take care of a pet, and think that releasing it is the kind thing to do. However, these non-native species can harm native species or the environment, and cost the state millions of dollars every year. Instead of releasing your unwanted pet, please consider these alternatives:

- Contact a pet store for proper handling advice or for possible returns
- Give or trade with another hobbyist or pet owner
- Donate to a local aquarium or zoo, school or nature center
- Seal aquatic plants in plastic bags and dispose of them in the trash
- Contact a veterinarian or pet retailer for humane disposal guidance
- Check MyFwc.com for Pet Amnesty days
