

Spring showers may (or may not) be on their way, but St. Lucie County Residents can play a vital role in water conservation!

Using our water supply wisely and responsibly here in Florida is very important...

- Reduces demands on Florida's fragile water-dependent eco-systems, like the Indian River Lagoon
- Helps to protect our current water supplies
- As our populations grows, it can help to meet our future needs
- Can save homeowners MONEY!

The way we use water as individuals and families can make a big difference! There are many ways to help conserve water every day, especially in the home landscape and yard.

Ten Quick Tips to Save Water in Your Yard and Landscape:
