The **Green Industry Best Management Practice (GIBMP)** program teaches environmentally safe landscaping practices that help conserve and protect Florida’s ground and surface waters including the Indian River Lagoon. It is a state regulation that any commercial landscape worker applying fertilizer to any property for pay must be in possession of the Limited Certification Urban Landscape Commercial Fertilizer License. Participating in this workshop is the first step to obtaining that license.

The **Limited Commercial Landscape Maintenance License Pesticide (LCLM)** workshop prepares the non-licensed participants for the LCLM pesticide applicator certification exam. To take the exam on the day of the training you must bring:
- a passport style photo
- a $150 check made out to FDACS (Florida Department of Agriculture and Consumer Services)
- proof of insurance with $500,000 general liability or greater signed by your insurance agent.
